Abstract: based on the goals of the development strategy of New Uzbekistan, the work analyzes the significance of the spiritual heritage of Alisher Navoi in studying the rich scientific heritage of our Great Ancestors and educating young people in the spirit of military patriotism. This article.

Keywords: Science-enlightenment, morality, education, upbringing, patriotism, selflessness, spiritual education, tolerance, humanism, spiritual heritage.

The history and culture of the Uzbek people goes back several millennia. The material and spiritual heritage left by our ancestors, created over the centuries, is a rich and unique part of the history of mankind. Most of it is the wealth accumulated in the sphere of culture.

As the President of our country stated: “We are not followers of others, but on the contrary, we have always been followers. We set an example for others with knowledge, education and culture. This is a quality that has become ingrained in our blood, in our descendants and has become our national values.” Today, the issue of educating young people in a military-patriotic spirit is considered as an integral and inseparable part of a comprehensive educational system for educating a physically and mentally healthy generation. On January 28, 2022, the decree of the head of our state “On the development strategy of the new Uzbekistan for 2022-2026” was adopted. Based on the goals of the development strategy of New Uzbekistan "In-depth study and wide propaganda of the rich scientific heritage of our great ancestors", on the basis of which the education of a military man as a perfect person is one of the important tasks of the condition for ensuring a stable socio-spiritual environment in military society. The study of the spiritual heritage of Alisher Navoi is of great importance in educating young people in the spirit of military patriotism.

The scientific heritage left by the great thinker, statesman and public figure Alisher Navoi has become the spiritual heritage of not only our people, but also all of humanity. Because the humanitarian ideas of His Holiness serve the benefit of all humanity, regardless of nationality, gender and social background.

Alisher Navoi is a genius who left subtle thoughts both in science and in education. Navoi recognized that knowledge is one of the most beautiful and necessary

qualities of a person, and the most important duty of every person is to acquire knowledge. According to Navoi, each young generation should study diligently to master science.

His thoughts on issues of science, education, morality are expressed in his scientific, philosophical and didactic works. Navoi, a great artist of words and thinker, expressed his thoughts on the education of youth in a number of his works, including his epics such as "Khairat ul-Abror", "Farhad and Shirin", "Leyli and Majnun", which are philosophical and educational epics. In these works, Navoi paid great attention to his philosophical, social and political problems, as well as issues of education and upbringing of people. They condemned evil qualities, sharply exposed hypocrisy and hypocrisy. In particular, Navoi glorifies such qualities as generosity, decency and modesty, respect for parents, honesty and correctness, the benefits of knowledge and humility. Several chapters of the work "Khairat ul-Abror" are devoted to issues of ethics and education.

Since the first years of independence, special attention has been paid to the implementation of our national identity, the restoration of the name of our great ancestors, the preservation and popularization of their spiritual heritage, and today the unique spiritual heritage of our grandfather Mir Alisher Navoi is a school of life for today's youth and future generations. There is no need to explain that the priceless teachings of the great poet play a very important role in the formation of high spirituality, patriotism and tolerance in the younger generation. Thanks to these unique works, we can better understand the essence of such noble qualities as goodness, love, friendship, justice and peace. It is necessary to read such works of the great poet as "Khamsa", "Majolis un-nafois", "Muhokamatul-lugatayn" without missing a second, and deeply understand their content. The great poet served the people all his life and promoted good ideas in all his works. The need to educate young people in the spirit of patriotism, their physical and spiritual preparation for the defense of the Motherland is one of the urgent tasks of our time. The education of cadets studying in military and paramilitary universities in the spirit of military patriotism is now carried out through all systems of educational work. Educating young people in the spirit of military patriotism should become one of the main tasks of all types of educational institutions. In our country, spiritual and educational reforms are considered one of the priorities of state policy. In our country, many measures are being implemented to further improve the spiritual and educational environment, popularize our traditions and values honed over the centuries.

In the system of the Armed Forces of the Republic of Uzbekistan, special attention is paid to raising moral and educational work to a qualitatively new level, further increasing the level of knowledge of military personnel, forming energetic, patriotically minded, devoted and selfless young employees.

Therefore, each of our young people preparing to defend the Motherland must be brought up in the spirit of high patriotism.

Patriotism is the highest human virtue. In one of his letters to Prince Badiuzzaman, Alisher Navoi expressed his exemplary thoughts about purpose: "If a person has no goal, he will not survive troubles. But if everyone has more desire, he will be more obedient to the command of the Almighty." A person who has a Motherland has high pride and a clear goal. A person who feels that his Motherland is a support like a mountain is always ready for any trials, any adversity. In conclusion, studying the life and work of our grandfather-thinker, we realize that he gave a personal example in creativity and creativity throughout his life. The works of Mir Alisher Navoi describe the importance of the honorable profession of serving the people, the superiority of the interests of the people over everything, the purity of such feelings as loyalty and devotion. Consistent study of such good ideas, their deep introduction into the consciousness of our youth is an important factor in the education of intelligent and educated specialists and perfect people.
