**Abstract:** English is important as the main language of global communication and culture. Today, the development of information technologies provides an opportunity to make the teaching process more effective and interesting. In this article, we will consider how information technology can be used in teaching English.

**Keywords:** English language, online platforms, interactive lessons, video materials, technologies, applications.

Online learning platforms such as Duolingo, Coursera, and edX offer students a wide range of opportunities to learn English. These platforms have interactive lessons, video materials, and quizzes so students can learn at their own time and at their own pace. And teachers can prepare their lessons using these platforms to make lessons more interesting. Mobile apps, such as Memrise and Babbel, make the process of learning English more convenient for students. Through these apps, students have the opportunity to improve their vocabulary, learn grammar rules and develop communication skills. With mobile apps, students can learn anytime and anywhere, which develops their independent learning skills. VR and AR technologies create new opportunities in teaching English. For example, with VR, students can simulate real-life situations, which can help them develop their communication skills. And AR apps provide interactive experiences for students to learn new words and phrases. These technologies increase the interest of students and make the teaching process more effective. Artificial intelligence (AI) technologies provide a personalized approach to teaching English. With the help of AI, it is possible to prepare personalized lessons and tasks based on the level of mastery of students. For example, through chat bots, students can ask questions and get answers to them. This will help them develop their communication skills. Social networks, such as Facebook and Telegram, give students the opportunity to communicate in English. Students can write articles or posts in English and discuss them on social networks. It helps to develop their written and oral skills. Students will also have the opportunity to exchange ideas and help each other. There are a number of online platforms for learning English. Duolingo is an interactive and gamified language learning platform. Students do a variety of exercises to improve vocabulary, learn grammar rules, and develop communication skills. Coursera is a provider of online courses offered by the world's best universities and educational institutions. There are English courses at different levels, including grammar, writing

and communication skills edX is a collaborative learning platform that includes courses offered by universities. There are many resources and lessons for learning English. Babbel is a mobile app and web platform for language learning. It offers students lessons and exercises that are relevant to real-life situations. Memrise is an interactive platform for vocabulary building and language learning. Students can learn new words with the help of video and audio materials. Busuu is an online language learning platform that provides students with interactive lessons and exercises to learn English. Students also have the opportunity to communicate with other language learners. Lingoda is an online language learning platform that provides students with live lessons and interaction with individual teachers. Lessons are available at various levels and topics. Tandem is a language learning social network that connects students with other language learners. Students can develop language skills by helping each other and communicating. HelloTalk is a mobile app that allows users to communicate with other language learners. Students can develop language skills through written and oral communication. These platforms allow students to make the process of learning English more interesting and effective. Each platform has its own approach and resources, so readers can choose the one that best suits their needs.

### **Conclusion:**

The use of information technology in teaching English allows teachers to conduct lessons more interactively and interestingly. And students will have the opportunity to develop self-study and communication skills. The use of information technology also helps to make the teaching process efficient and convenient, which makes learning English even easier. These new opportunities for teachers and students will serve to further develop the English language learning process in the future.
