

RESPONSIBILITIES OF A DENTAL NURSE

Vohidova Feruza Ganievna

*Afshona Abu Ali Ibn Sina Public Health Technical School,
Department of Professional Subjects, Leading Teacher*

Ruzieva Gulchekhra Atoevna

*Afshona Abu Ali ibn Sino Department of Public Health-Professional Sciences,
Senior Lecturer Valeology*

Introduction:

1. Nursing in the Field of Dentistry : An overview of the role of dental nurses and their importance in dental practice.
2. Education and Qualifications of Dental Nurses : The training and professional education process for this occupation, as well as the ways dental nurses enhance their qualifications and acquire new knowledge.

Main Body:

1. Maintaining Oral Health and Prevention :
 - Nurses provide patients with advice on oral health and hygiene.
 - Explaining and teaching patients the necessary hygiene practices to prevent dental and oral cavity problems.
2. Assisting in Procedures :
 - Assisting dentists during dental procedures: preparing instruments, sterilizing, and providing the necessary materials.
 - Providing instruments during operations, monitoring the patient's condition, and offering care.
3. Working with Patients :
 - Preparing patients for procedures and gathering necessary information.
 - Taking anamnesis, completing and updating medical records.
 - Managing pain, informing patients about procedures, and preparing them psychologically.
4. Adhering to Sterilization and Hygiene :
 - Sterilizing and keeping clean the tools and equipment used in the oral cavity.
 - Nurses follow clinic hygiene and safety protocols, reducing the risk of infection.
5. Handling Medications and Materials :
 - Working with medical preparations, anesthetics, and dental materials, ensuring proper dosing.
 - Managing and ordering necessary supplies.
6. Monitoring and Caring for Patients :

- Observing patients after dental procedures, preventing complications, and providing necessary care.

Conclusion:

1. The Importance of Dental Nurses in Dentistry : Their role in dental practice, clinic operations, and patient care.
2. Future Development of Dental Nurse Responsibilities : Familiarization with new technologies and processes, improving knowledge and skills.
